

Assessment

Part 1: Core – Web & PHP Fundamentals

Scenario:

You work as a junior web developer at “TechEdge Motors.” They want to digitize their customer interaction form.

Tasks:

Task Area	Description
Frontend Form	Create a responsive form in HTML/CSS that collects: • Name • Phone • Email • Vehicle details • Complaint
Backend Logic	Store this in a MySQL DB using PHP.
Display Submissions	Display submissions in a tabular format using a view.php page.

Key Skills Assessed:

- HTML/CSS layout and inputs
- PHP form handling
- Basic SQL (INSERT, SELECT)
- Error handling, validation

Reflective Thinking:

How would you improve data validation and user feedback on form errors?
